Doctors Stroke Program, your second chance.

Loss of function after a stroke doesn’t have to be permanent. Research has proven that repeated practice with a stroke affected arm or leg causes the brain to make new connections thereby restoring that limb’s function.

Dr. Katz designed our program to utilize staff from all departments to provide patients with practice using their affected limbs throughout the day.

Doctors Stroke Program features:

- One-on-One therapy seven days a week
- Up to 4-6 hours of rehabilitation per day
- Maximum stays of over three months
- State of the art equipment

Traditional rehabilitation programs settle for teaching patients how to live with stroke disability. Work toward full recovery at Doctors Stroke Program.

Results Oriented Rehabilitation.

Customized Physical, Occupational, and Speech Therapy plans are devised for each patient based upon our 5-part Neurological Assessment. Dr. Katz and our board certified staff physiatrist, Dr. Nguyen, monitor each program participant to optimize their progress and prevent secondary strokes.

Nursing Staffed for Success.

We know that stroke patients can initially be very dependent. Doctors Stroke Program has more hours of nursing care per patient than any comparable facility in Passaic County. This ensures that patient needs are met without delay.

All the comforts of home... so you can get back to yours sooner.

Residents enjoy a full range of amenities at no added charge:

- Electrically-adjustable hospital beds with pressure-relieving mattresses
- 26” high-definition LCD television with cable programming
- Pillow speakers with nurse call button system
- High-speed internet access
- Bedside telephones with direct-dial nationwide service
- One-on-One therapy seven days a week
- Up to 4-6 hours of rehabilitation per day
- Maximum stays of over three months
- State of the art equipment
“This program is a game-changer for stroke patients; an opportunity for them to regain function and return to the life they enjoyed before their stroke.”

Your second chance starts today.

Medicare, Medicaid and most insurance plans are accepted, and we will allow your community physician to follow you here.
