

Doctors Subacute Care is committed to the health and safety of all its residents and staff. As such, we require appropriate staff and residents to be tested for Covid-19 on a scheduled basis. As of today, August 26, there have been no new positive cases. All previously positive cases have fully recovered. We are monitoring each resident and staff member to detect any potential cases early. We are also following all CDC and NJDOH guidelines to protect our residents and staff.

We greatly encourage all residents and staff to be fully vaccinated against Covid-19. Being vaccinated will help prevent additional transmission of the disease as well as protect against serious side effects.

**We have a new Resident Phone Line!  
Please dial (973) 968-4350 to reach your loved one.**

Please read our Visitation Guidelines carefully:  
We received further guidance from the State and Federal government allowing all families to visit their loved ones in the facility. Families will no longer need to make appointments to see their loved ones, nor will the visits need to be in the conference room/ dining room. Doctors Subacute Care reserves the right to make sure visits are done following Covid-19 and infection control protocols. Of course, if you are feeling ill, please refrain from visiting.

To protect our staff and your loved ones, we strongly encourage visitors to provide proof of vaccination and/ or get tested upon entry to the facility.

Feel free to visit us on the web at <https://doctorssubacute.com/covid19/> to learn what we have been doing to protect your loved ones during this time.

We thank all our residents and families for their understanding and diligence in helping us keep our residents safe, healthy and being a part of maintaining a Covid-19 free facility.

**Covid-19 by the Numbers August 26, 2022**

**0 Positive Residents  
0 Positive Staff Members**
